About

I am an experienced developer with over 10 years of experience in software development. I have worked with a variety of frameworks including Zend, Symfony, Laravel, Yii2, CodeIgniter as well as CMS platforms such as Magento and WordPress. My expertise includes back-end and front-end development and web development.

Tech Stack & Skills

- **LANGUAGES & FRAMEWORKS:**
  - PHP, Javascript, HTML, CSS, Python, Java, C++, .NET, SQL.
  - Zend, Symfony, Spryker, Magento 1&2, Yii 1&2, WordPress, Sass, Less, TailwindCSS, ES6, AngularJS, VueJs, Reactjs, CodeIgniter, Laravel, Spring, Redis, Elastic Search, MySQL, SQL Server, Postgresql.
- **Technology & Tools:** Dockers, AWS (EC2, RDS, S3), GCP (bigquery SQL), CentOS, Ubuntu.Varnish, Vim, Jenkins, RabbitMQ, Redis.
- **SOFT SKILLS:** Agile Methodology, Well-known OPP & Design Pattern, Problem-solving.

Experience

IVvy - Venue Management Software
09-2023 - Now

Senior Software Engineer:
- Development of the database structure and work with MySql version 5.7.
- Development on Zend 1 Framework. In the beginning, they used PHP 7.4 and were upgraded to 8.3.
- Create an Uplift component for forecast revenue (named Projected Spend).
- Create Reports in the platform by using AG Grid v26.0.0.
- Re-skin the UI within the iVvy platform forms using Antd design system components (Input, Button, Radio, Date Picker, Time Picker, Checkbox, etc).
- Validate and display simple and complex forms, convert forms into business objects, and store data.
- Migrating data by using Beanstalk and writing the release guidelines without downtime.
- Write the Unit tests. We use the PHPUnit framework to organize tests, perform assertions, run tests, and view the test outcomes in a standardized way.
- Do the audit logs by recording system events that capture all events by users. These logs are essential for several reasons: Compliance, Security, Debugging and Troubleshooting, and Improved accountability.
- Teamwork & Agile: Support team member QA, Front End understand the EPIC, and review code for a leader. Join all of the meetings: Refinement, Retro, and Planning.
- Technology and Tools: PHP(Zend 1), Full-Stack Development, Javascript jQuery, HTML, CSS, Mysql, AWS, APIs, REST, CI/CD (Bitbucket Pipeline), PHPStan, Rector PHP, PHPUnit, Easy Coding Standard (options: clean code, doctrine annotations, Namespaces, Spaces, Array, Docblock, PSR 12, Common), XDebug, Beanstalkd, Docker.

Experience

NFQ Asia
10-2019 – 09-2023

Highland Coffee- *(is a global company belonging to VietThai International Join Stock, which accounts for about 40% of Viet Nam coffee production)*:

- Skills: PHP, Python, Symfony, Shopware 6, Mysql 8, MongoDB, Docker, FireStore (Firebase), GCP.
- In the Highland project, We have three periods:
  - The first time, I joined the team as a Consultant Engineer to build the load test by using the Apache Jmeter. I also handle the GCP infrastructure for monitoring the system when Highland runs the promotion campaign by scaling up or down the nodes or pods on K8S. Next, I worked on Google bigQuery where I could check the slow query and apply it on MongoDB on Staging. Then, I worked as an Engineer Coordinator. A vendor provided Highland with a mobile application and I was responsible for exporting the revenue data to the Accountant and Finance department. So I decided to use Python with Pandas library to export the report every day. Our vendor used to store data by MongoDB because It is a NoSQL database with a lot of collections inside, I imported the Pymongo library to build the reader and pandas library for exporter.
  - After that, I joined as a tester to test the POS Shadowing system and create the report in 1 month. The same vendor provided Highland with the new POS software to replace the old systems, they had permitted to run the shadowing in 2 weeks, but they extended it to 2 weeks
  - Finally, I worked as a mobile and back-end developer on a POC project for Highland. They needed a new mobile application and a back-end system that could handle the orders and Out-of-stock Products. I used Flutter which uses Dart language to build the app Coffee with these functions: render the Figma template to app Flutter layout, Authentication, fetching and render the data (order history, settings, promotion, location, menu), implement the business logic checkout flow. For the backend workload, I was in charge of the REST API with these functions: Settings, Promotions (to adapt with their multiple programs: BuyXGetY, Fixed/Percentage Amount, Loyalty program, …)

Scania - *(is a global company with sales of trucks, buses, engines & services in more than 100 countries. Scania's production units are located in Europe)*:

- Skills: PHP, Spryker, Symfony, Redis, Elastic search, MySQL, Jenkins, HTML, SASS, ES6, AngularJS, Docker.
- In Scania, We have three sites:
  - Portal site helps customer can be easy choose multiple products with a suitable cost, because this platforms is where a lot of merchants provide various products and abstract costs. (we custom the product attributes and business logic. Then I show these options logic to front end sites)
  - Beside that the merchant site help merchants where they can manage their products, profits, orders or they can edit their campaign for attracting customers (we use Spryker package (extended from Angular or ES6 package, For example: https://www.npmjs.com/org/spryker) to build the Spryker components for merchant convenient tools on UI.)
  - Finally, the admin site help Manager they can manage all merchants, orders, products, promotions, publish & sync data by manual, create some static pages (allow dynamic data inside), report pages.
- Base on the Spryker E-commerce platform: custom new layout and apply new business logic for customer that they can buy trucks easily.
- Services Integration: WorldPay, Stripe *(Payment platform)*.

Road Surfer - (is the campervan and motorhome hire an expert in Europe and grow up With 52 stations in 12 countries in Europe and America):

- Skills: PHP, Symfony, Mysql, HTML, CSS, Doctrine, JS, Cron jobs.
- The project has four teams: two in Germany and two in Vietnam, I am a member of the CK team in Vietnam and we build micro-services for pricing API.
- In Road Surfer:
  - Customers can create an account and book a booking with a discount code or membership promotion and they can rent any accessories for their trip on campervans.
  - We built the Station Planner that can help the staff interact easily by creating a booking or checking the status of bookings/cars on the calendar in real-time.
  - Besides that, we implement the management cars/plate number/available cars/create or cancel or return bookings.
- Services Integration: Adyen (Payment platform), Mailchimp (Emailing platform), Zendesk (Customer support), Air table (Dashboard sheet), Sentry (Error Handler).

Experience

Cansativa Health - (is the one-stop platform for the import and distribution of medical cannabis in Germany):
- Skills: PHP, Spryker, Symfony, Redis, Elastic Search, MySQL, Jenkins, HTML, SASS, ES6, AngularJS, Docker.
- Build a merchant portal page where the merchant can manage their products and orders, etc. On this page, We use AngularJS and Twig files to build UI.
- Based on the Spryker E-commerce platform: custom new layout and apply new business logic for customers so that they can buy trucks easily.
- Services Integration: WorldPay, Stripe (Payment platform).

Edgeworks Software
03-2019 - 10-2019

Associate Technical Architect:
- Involved in the new & old structure projects: Setup tool CI deployment/monitoring systems on Ubuntu or AWS servers (for example Sonarqube, Jenkins). I had a chance to learn about AWS services: EC2, RDS, Route53, S3, SNS, elastiCache, ...).
- Docker builds for all projects for backup.
- Besides that, my role also includes coding review/applying new code quality (PHP-CS-Fixer, PHP Lint, Phpstan)/writing a new plan/proposal plan for customers/ doing migrations (database, upgrade/downgrade package AWS for the huge traffic by marketing event purpose).
- Coding: I enhance and implement the new requirement by using the e-commerce platform Magento2.
- This is the project site https://www.easyshed.com.au/
- They sell sheds. It looks like a small house where they leave their house tools or park their car. They are the top 1 seller of this product in Australia.

SSTech
04/2016 – 03/2019

CO.OP Corp Omni Channel (01/2017 – 03/2019)
- (is the top ten best-seller supermarket platform for the import and distribution of retail products in Viet Nam, Some of their famous children's brands: are Co.op Mart, Co.op Food, etc):
- Skills: PHP, Magento 1&2, Yii 2, Elastic search, MySQL, SQL Server, Jenkins, HTML, SASS, JS, ES6, Redis, PHP-fpm, Nginx, Apache, AWS - EC2, Varnish.
- Leader Role: Join planning meetings and break tasks for the developer. Involve Refinement meetings/contributing the ideas to clients and explaining these ideas to developers.
- Management Server side: Set up CI/CD, and build the automation jobs—debugging/Solving when the server is down. Monitor the Services on the Server (PHP-FPM, Crontab, Supervisord, elastic search, redis, varnish). At this time, I deploy coding on the server manual, I use Capistrano Tools - This is a bash script package written by Ruby.
- Coding: Implement RESTful/XML APIs because, in Omni channels, we have multiple child sites (e.g., POS for cashier, KioSKS, etc.). Implement some new features (e.g., Promotion Program, Pricing, Orders, Products, Stocks).
- Services Integration: Viettel Invoices, Internal Co.op Mart(Using Yii2 platform to custom pricing at their local warehouse), Loyal Customers(a huge customer's information and their points were developed and maintained by 3rd party JDA).

Car-chase
- Specializing in buying and reselling used cars:
- Skills: PHP, Yii 2, MySQL, Jenkins, HTML, CSS, JS, PHP-fpm, Nginx, Apache, CentOS.
- Convert the Photoshop Design to HTML/CSS.
- Integrate the third-party Braintree for payment.
- Using WordPress with BeTheme to build a Theme Builder for customers can be maintained by themself.
- On the Backend side, I built an Admin page for Data management and Reports.

Callnex
01/2014 – 04/2015

LaHouse (Vietnam Cosmetic Website)
- Specializing in cosmetic sales, I translated PSD designs into responsive HTML/CSS layouts, ensuring pixel-perfect implementations and a seamless user experience across devices.
- Key Technologies: HTML5, CSS3, Bootstrap, jQuery.

Imove Portal (Location Pickup & Delivery Service)

- Developed the front end for a location-based service website, ensuring user-friendly navigation for pickup and delivery information. I collaborated with designers and backend teams to build a clean and efficient user interface.
- Key Technologies: HTML, CSS, Bootstrap, jQuery.

Callnex Customer Portal (Company Introduction Portal)

- Built a portal page to showcase company services and information, focusing on design consistency, intuitive layout, and responsiveness across all platforms.
- Key Technologies: HTML, CSS, Bootstrap, jQuery.

Achievements

- Sai Gon University
  Engineering in Information Technology
  Completed in 2013

- Spryker Certificate
  Completed in 2022
